**DETAILED ACTION**

***Allowable Subject Matter***

Claims 2-3 and 5-8 are allowed.

The following is an examiner's statement of reasons for allowance: The examiner has reviewed the prior art of Coldren (US4896325) in light of applicant's claimed invention and finds that the claims define over the prior art of Coldren. Coldren does not disclose or suggest inter alia the limitations of a method of evaluating a tunable laser and determining suitable laser operation points, comprising: leading part of the output light emitted by the laser to a first detector that produces a first detector signal indicative of output power of the laser and to a second detector via a Fabry Perot filter, the second detector producing a second detector signal at least partly indicative of the wavelength of the light emitted by the laser; sweeping the tuning currents to pass through different current combinations, including sweeping a current through the reflector section in one direction and then in a second direction; determining ratios of the first and second detector signals corresponding to the different current combinations; and storing a control combination for the tuning currents, corresponding to an operation point, when the ratio of the first and second detector signals lies within a predetermined range signifying that the emitted light lies within one of a number of wavelengths

given by the Fabry-Perot filter and the ratio lies within the predetermined range when the reflector current is swept in both the first and second directions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
